

DONATION ADD-ON AT CHECKOUT

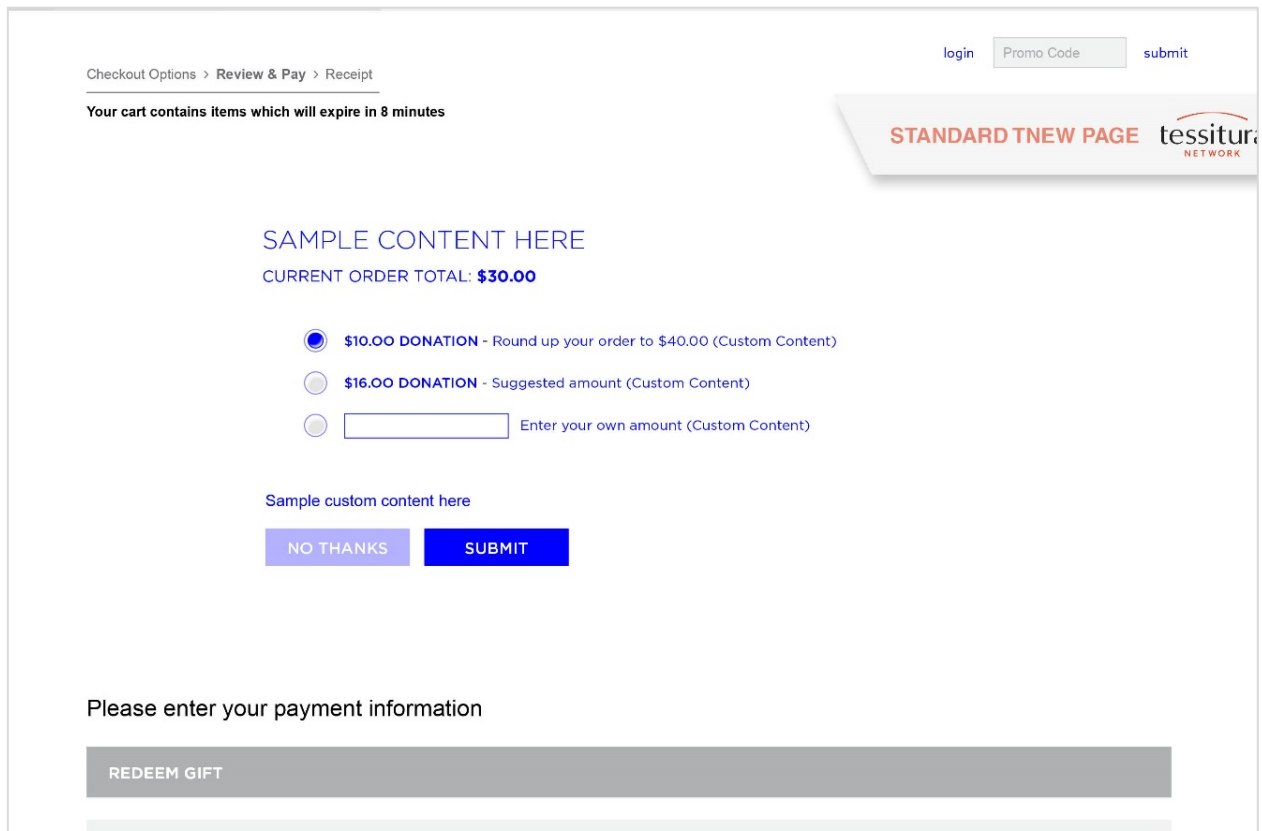

DOCUMENTATION

OVERVIEW

This custom plug-in provides the capability to present the web user a donation ask at the TNEW payment page upon checkout. The customer can choose one of three options: a rounded up amount, a suggested amount, or an amount of their choosing; or to decline to add a donation.

Configuration options are provided to the Tessitura user to customize the display of these 3 options to the web user.

Designs

The screenshot displays a checkout page with the following elements:

- Navigation:** "Checkout Options > Review & Pay > Receipt" and a "login" link.
- Promo Code:** A field labeled "Promo Code" with a "submit" button.
- Cart Status:** "Your cart contains items which will expire in 8 minutes".
- Page Header:** "STANDARD TNEW PAGE" and the "tessitura NETWORK" logo.
- Content Area:**
 - "SAMPLE CONTENT HERE"
 - "CURRENT ORDER TOTAL: \$30.00"
 - Three radio button options:
 - ☒ **\$10.00 DONATION** - Round up your order to \$40.00 (Custom Content)
 - ☐ **\$16.00 DONATION** - Suggested amount (Custom Content)
 - ☐ Enter your own amount (Custom Content)
 - "Sample custom content here"
 - Two buttons: "NO THANKS" and "SUBMIT".
- Payment Section:** "Please enter your payment information" and a "REDEEM GIFT" button.

Design & CSS styling for this plug-in is based on the standard TNEW stylesheet and default classes. Additional styling requests will be considered at your current hourly rate.

System Tables

LTR_TNEWCUSTOM_DONATION_ASK

This is the main setup table to drive the custom add-on donation ask in the payment screen. Each row of this table is meant to represent rules for displaying a set of donation options for a given Mode of Sale and Order Total range. Thus, the combination of MOS, Ord Tot start amount and Ord Tot end amount below should be unique for each row of this table.

Column	Comments
mos	The mode of sale for which the customization will be active. If a donation ask should apply to all modes of sale, leave this field blank. Otherwise, each mode of sale should be configured in its own setup row.
ord_tot_start	Order total Start amount. The start of the dollar range for order amounts, including fees.
ord_tot_end	<p>Order total End amount. The end of the dollar range for order total amounts, including fees.</p> <p><i>Example: If you want specific options for order totals of \$0.01 to \$99.99 but a different set of options for \$100.00 to \$199.99, each rule would be its own row with the appropriate start and end amounts.</i></p> <p><u>NOTE:</u> In the event that there are overlapping amount ranges across setup rows for a MOS, the customization will pick the first applicable rule for the relevant MOS and order total.</p>
header_text	The content of the first portion of the ask screen (HTML-friendly, can include image references and links as long as they are valid HTML).
sub_header_text	The content beneath the header text portion of the ask screen (HTML-friendly, can include image references and links as long as they are valid HTML).
roundup_button_text	The text which will appear to the right of the round up button when active. May contain tokens* to indicate the amount.
suggested_amt_button_text	The text which will appear to the right of the suggested amt button when active. May contain token* to indicate the amount.

Column	Comments
instructional_text	The text which will appear above the NO THANKS and SUBMIT buttons, and below the radial donation options.
other_amt_short_text	The text which will appear to the right of the text box for input of user-specified amount when active.
submit_button_text	The label on the button to denote SUBMIT of options – this will add the donation to the cart, reload the payment screen, and end the customization for this session.
nothanks_button_text	The label on the button to denote DECLINE of donation options. This will reload the payment screen and end the customization for this session.
round_up_formula	Lookup of increment amounts for roundup donation ask. These options can be added/modified in the LTR_TNEWCustom_Donation_Ask_Formula table.
min_donation_amt	An optional minimum dollar amount for a round-up donation. <i>Example: if rounding to the nearest \$10 (according to round_up_formula), but min_donation_amt is set to \$4, an order total of \$46.01(up to \$49.99) will round up to \$60.</i>
suggested_amt	The default value for suggested amount.
contrib_type	Dropdown of contribution types to apply the contribution to (pulls from LTR_TNEW_CONTRIB_TYPE and uses payment method specified).
roundup_active	Checkbox to indicate roundup radio option is active & displayed for this rule.
suggested_amt_active	Checkbox to indicate suggested amount radio option is active & displayed for this rule.
other_active	Checkbox to indicate other amount radio option is active & displayed for this rule.
Inactive	When checked, inactivates this row from the customization

Column	Comments
<u>*Tokens for content:</u>	<p>{Order_total_w_fee}: The total amount due in cart including fees.</p> <p>{RndUp_amt}: The amount of the round up that would be added upon selecting this option.</p> <p>{RndUp_total}: The total amount of the order INCLUDING the round-up amount that would be added upon selecting this option.</p> <p>{Sugg_amt}: The suggested amount that would be added upon selecting this option.</p> <p>{Sugg_total}: The total amount of the order INCLUDING the suggested amount that would be added upon selecting this option.</p> <p>Sample roundup_button_text:</p> <p><i>I'd like to add a gift of {RndUp_amt} to round up my order to {RndUp_total}.</i></p>

LTR_TNEWCustom_Donation_Ask_Formula

This table supplies the values to the round up formula dropdown in LTR_TNEWCustom_Donation_Ask.

Column	Comments
description	Text that is displayed in dropdown
value	This is the value used by the plug-in to calculate the round-up value. Must be a numeric value only with no special characters and a whole amount.

Notes

- To toggle the customization on or off, go to system table LTR_TNEWCUSTOM_WEB_DEFAULTS and set entry checkout_ask_component_is_enabled to either Y (to enable) or N (to disable).
- The customization WILL be invoked if there is not a contribution in the cart.
- The customization WILL be invoked if there is a Membership in the cart.
 - A membership is defined as either:
 - member_Level_No is defined in LTR_TNEW_CONTRIB_TYPE
 - standard tessitura membership configuration (ie Fund associated with a membership campaign)
- The customization WILL NOT be invoked if an on account contribution is already in the cart.
- The customization WILL display in all other cases, if there is a row in the LTR_TNEWCustom_Donation_Ask table that matches the cart based on mode of sale and order total.
 - The order total is calculated based on ALL cart contents including Ticket Amounts, Fees, and Membership Contributions.
